LOCKDOWN IN INDIA IS GOOD OR BAD

Coronavirus in India: 21-day lockdown begins; key highlights of PM Modi's speech
* India needs to ensure that workers in its informal economy, as well as small business owners, have sufficient cash flow during the 21-day lockdown period, Kunal Kundu from Societe Generale said.
* Prime Minister Narendra Modi in a televised address Tuesday said people would not be allowed to leave their homes for three weeks after the order went into effect hours later at midnight.
* Kundu added that New Delhi could look to adopt a temporary universal basic income scheme to support those who'd be most affected by the lockdown so that they would have some form of cash flow in order to survive.
* India currently has 512 active cases of COVID-19, the respiratory illness caused by the coronavirus that was first detected in China and has since infected more than 375,400 globally and killed over 16,300, according to data from the World Health Organization.
DUE to lock down the cases that have to come they will come out and it can be treated and so that it further not spread

☞ This is the site that shows live updates of the corona virus cases

Basic HTML Table

Firstname	Lastname	Age
steve	medrid	19
